DETAILED ACTION

Elections

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In order for more than one species to be examined, the appropriate additional examination fees must be paid.

The species are as follows: (grouped under cyclin-dependent kinase inhibitors in the application): purine-based derivatives, pyrimidine-based derivatives, benzenesulfonamides, flavonoids, thiazole derivatives, paullone derivatives, staurosporine derivatives, indigoid bisindoles, butyrolactone 1, pyrazolopyridine compounds, indol derivatives and amino-pyrazole compounds. For the elected group of compounds the applicant must elect a single species.

The following claim(s) are generic for the above-mentioned species: 1-2, 9-10 and 15-16.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: they are structurally different compounds or group of compounds.

Inventorship Notice

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
